

1UP GIRL Series Manual

Thank you for purchasing 1UP GIRL Series Models!

How to use it:

STEP1:

It's important to choose a 'Color Space' before use Magic Snow. The preferred Color Space for realistic rendering is Linear. By default Unity use Gamma Color Space. To change it go to (Edit > Project Settings > Player), inside Other Settings tab you will find Color Space* — change it to Linear.

STEP2:

Note:

If you find something wrong with the effect of Game View by importing package(for example, the AO effect over covers your model too much), it could be adjusted by uncheck “Low Resolution Aspect Ratios” setting to fix it.

Enjoy It!
